SUMMARY

Computer Science (AI) undergraduate with strong problem-solving skills, having solved 300+ LeetCode problems (peak contest rating: 1610). Experienced in building AI-powered and full-stack web applications using Python, Flask, React.js, and REST APIs. Passionate about backend development, machine learning, and designing scalable software solutions.

EDUCATION

Bachelor of Technology (CSE), **KNIPSS Sultanpur**

2023 – 2027

CGPA: **8.32/10.0**

Senior Secondary (12th, CBSE Board) – 61.1%

2023

Secondary (10th, ICSE Board) – 84.4%

2021

SKILLS

- **Programming:** Java, Python, JavaScript
- **Frameworks & Libraries:** React.js, FastAPI (Fundamentals)
- **Backend:** Node.js, REST APIs
- **Databases:** MySQL, SQLite, Oracle(SQL PLUSE)
- **Core Subjects:** Data Structures & Algorithms, DBMS, OOPs, Operating Systems, Computer Networks, System Design (basics)
- **Tools:** Git/GitHub, Docker, VS Code

PROJECTS

Vedic Astrology Fortune [GitHub](#) [Live](#)

April–May 2026

Tech Stack: *React.js, Vite, JavaScript, Tailwind CSS, Flask, Python, Gemini API*

- Developed an AI-powered Vedic astrology platform that generates personalized horoscope predictions and astrological insights based on user birth details using the Gemini API.
- Built an interactive and responsive frontend with React, Vite, and Tailwind CSS, enabling users to explore birth charts, zodiac information, and AI-generated fortune reports through an intuitive interface.
- Designed a Flask REST API to process user inputs, integrate with LLM services, and generate structured astrology recommendations while handling API errors and response validation.
- Deployed the production-ready application with the frontend on Vercel and backend services separately, ensuring fast performance, scalability, and a seamless end-to-end user experience.

Wanderlust AI Trip Planner [GitHub](#)

Oct–Nov 2025

Tech Stack: *Python, Flask, Gemini API, HTML, CSS, JavaScript*

- Developed an AI-powered trip planner that generates personalized travel itineraries based on user preferences.
- Integrated the Gemini API to recommend destinations, attractions, and optimized day-wise travel plans.
- Deployed the application with efficient API integration and robust error handling.

E-Commerce Recommendation System [GitHub](#)

Aug–Sep 2025

Tech Stack: *Python, Flask, Pandas, Scikit-learn, HTML, CSS, JavaScript*

- Developed an e-commerce recommendation system that suggests products based on user preferences using machine learning techniques.
- Implemented data preprocessing, similarity-based recommendation algorithms, and optimized search for improved recommendation accuracy.
- Deployed the application with a responsive user interface for seamless product discovery.

INTERNSHIP

Web Developer Intern @ Codevirus Security Pvt. Ltd.

Jan 2026 – Mar 2026

- Developed 2 Learning Management System (LMS) modules using PHP and MySQL for secure notes upload, download, and role-based access.
- Implemented employee login, attendance tracking, and live class management features as part of the organization's CRM platform.
- Optimized backend functionality by collaborating with the development team and received a Letter of Recommendation for technical contributions and performance.

CERTIFICATIONS

- HackerRank Certifications: Java (Basics), Python

ACHIEVEMENTS

- Solved **300+** Data Structures & Algorithms problems on [LeetCode](#) with a maximum contest rating of **1610**.
- Qualified the **Smart India Hackathon (SIH) 2025**.
